

## Weapons Control System

### The High Security: Model 9084HSB

#### Proven Anti-terrorist Technology

Isotec's Model 9084HSB is a Two Lane, Uni-Directional Weapons Control System, offering the highest level of commercial security. The use of two lanes provides for a weapons control lane and an exit lane to accommodate higher traffic facilities and provide seamless security. An anti-retrack function built into the system prevents persons from entering through the exit lane.

Built to withstand .44 Magnum round at 1950 fps.

Site-specific options, employing modular designs, are common to the 9084HSB, allowing for height, width and length modifications to fit an existing entrance or to be specifically constructed to meet architectural requirements. **Call us today at 303-452-0022 or visit our website at [www.isotecinc.com](http://www.isotecinc.com) for more information.**

#### "Deterring, Detecting, Protecting"

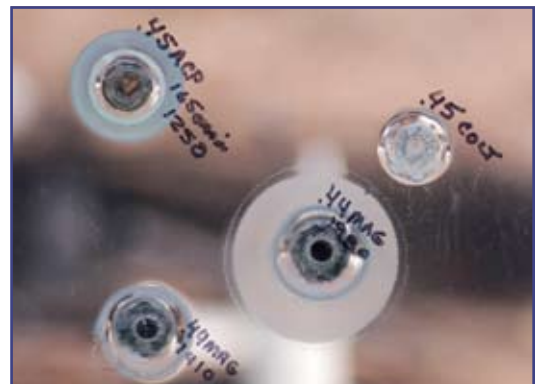

- Highest Commercial Security
- Greater Flexibility in Design
- Rapid ROI vs. Guard
- Site-Specific Construction

#### Conforms to All New National Codes
